

PIRRELLA™

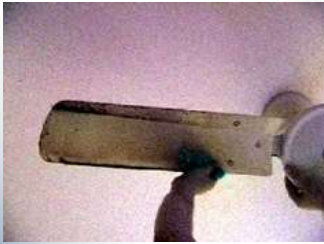

PIRRELLA FANSLEEVES

A BREEZE THAT CLEANS

No more Cleaning of Fan Blades What a FANTastic good Aussie idea.

In 1994, when Pirrie Sargent relaxed in his recliner chair under the living room ceiling fan, and looked up to see a dusty & dirt coated ceiling fan, his composure turned to one of feeling that here as a job that simply no-one in the house wanted to do!!

The idea of slipping a transparent disposable fabric elastic fabric sleeve over the fan blades was developed over the next 2 years.

No more cleaning !!!

Ideally, every new fan should have a set of Pirrella Fansleeves to go with it, as with Pirrella Fan Sleeves on a new fan, you will always have a clean fan and protection for the leading edges of your fan.

A BREEZE THAT CLEANS

Pirrella's revolutionary Sleeves for Ceiling Fans ensures a cleaner fan. These form fit sleeves prevent dust reaching the surface of the ceiling fan and can be easily slipped onto the blades in a matter of minutes.

With regular use & replacement of Pirrella Fansleeves, you will notice the benefits & avoid the awkward task of conventional cleaning and your time spent. Pirrella Fansleeves also reduce deterioration of your Ceiling fan blades.

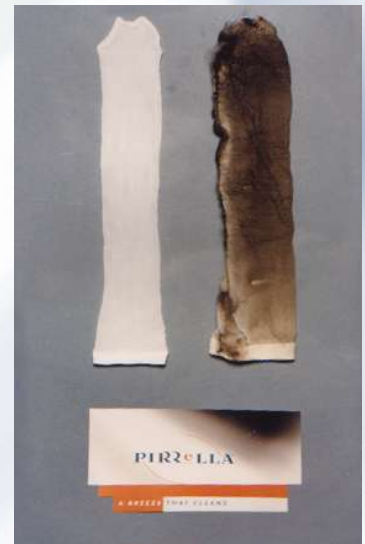

The sleeves are made of a compound of nylon / elastin and one size fits most ceiling fan blades. These form fit sleeves have properties that collect air-borne dust, and once fitted, Pirrella Fansleeves are transparent and do not detract from the look of the fan blade. Most ceiling fan blades are white metal and with the fan sleeve fitted to the Ceiling Fan Blade it is difficult to discern.

NO MORE CLEANING OF FAN BLADES & NO MORE CLEANING UP OF THE UNDERNEATH AREAS.

An added advantage is that when the sleeves are removed, they are inverted, so as to collect the dust accumulated, and thus prevent it falling onto the underneath area.

We believe that our product is unique and is an improvement to the quality and healthy living of the users. Our sleeves are also designed towards cost savings with detergents, cleaning agents & the like.

In addition to a cost saving and a time saving factor, Pirrella Fan Sleeves reduce the deterioration of your fan blades and protects the leading edge of the blade which easily corrodes through the action of the gathering of dust deposits present in the air resulting from the initial separation of the air by the leading edge. Pirrella Fan Sleeves will give added life to fan blades, and extend the period of their eventual replacement.

PIRRELLA™

PIRRELLA FANSLEEVES

A BREEZE THAT CLEANS

Pirrella FANSLEEVES are a BREEZE THAT CLEANS

Available in

- * 3 sleeve pack
- * Home Value 12 sleeve Pack
- * Dealer Enquiries welcome
- * Postal Orders Accepted

Colours available

White, Honey Beige,
Stainless Steel Grey and Black

* CLEANER AIR - A BREEZE THAT CLEANS

- * A positive clean upper and under surface of fan blade
(Top surface usually not sighted by cleaners or supervisors)
- * Reduces the time to "clean" the fan blades
(sleeves can be slipped on and off in a matter of minutes)
- * Greatly reduces the work-up time to clean fans.
- * Eliminates cleaning equipment e.g. buckets and detergent, spray packs, rags etc
- * Reduces safety and health exposures e.g. less time on a ladder or reduces lumbar stress if a pole cleaning device is used.
- * No fallout from fan-blade e.g. invert sleeve during removal - this action contains matter collected on sleeves
- * Reduces replacement time of fans as sleeves help to protect the leading edges from deterioration and overall abrasive exposure to conventional cleaning methods.
